Staff also developed and met with various providers concerning fair housing. Staff also continued to support the Neighborhood Advisory Commission.

The Property Improvement program staff continued to provide improvements to low and moderate income homeowners as the weather improved. Staff also provided support to various sub-recipients during the month. Per HUD environmental requirements, the City is the responsible entity and may be required to process and approve environmental submissions for other entities using HUD funds within our area. This could be problematic as one staff member has always handled the environmental process and this

could create measurable staff time issues. Staff will be seeking more guidance concerning this potential issue.

CITY OF CUMBERLAND MARYLAND

ENGINEERING DEPARTMENT

Inter-Office Memorandum

TO: Jeff Rhodes, City Administrator

FROM: David Umling, City Planner

DATE: March 24, 2015

RE: 2014 Planning Commission Annual Report

Sections 1-207 & 208 of the Land Use Article of the Annotated Code of Maryland requires that the City prepare and adopt a Planning Commission Annual Report, which must be adopted by the Planning Commission, presented to the Mayor and Council (which may authorize any changes to the City's development review process recommended in the report), submitted to the Secretary of the Maryland Department of Planning (MDP), and made available for public inspection. The law also requires that the report be adopted and submitted to MDP prior to July 1 of the following year.

Staff prepared the attached report (7 copies, 1 for the Mayor and each Council member, 1 for the City Clerk's official record, and 1 for the City Administrator) and presented it to the Planning Commission at its March 23, 2015 special meeting. The Planning Commission voted unanimously at the meeting (4-0 in favor) to adopt the attached report. The report concludes that no changes to the City's Comprehensive Plan or review procedures are necessary. I am forwarding this report to you for the scheduling of a presentation to the Mayor and Council, prior to final submission to Secretary David Craig at MDP.

Please let me know when in May this report can be scheduled for presentation to the Mayor and Council. I would like to schedule this presentation for the same date as the public hearing for ZMA 15-01, the 208 Oldtown Road RR Rezoning. If you have any questions or concerns about it, please contact me. Thank you for your assistance.

ANNUAL REPORT OF THE CUMBERLAND PLANNING COMMISSION

CY2014: January 1 – December 31, 2014

Adopted by the Cumberland Planning Commission on March 23, 2015

I. Introduction

The Land Use Article of the Maryland Annotated Code (formerly known as Article 66b) requires that every local Planning Commission prepare an Annual Report to assess development activity and public facility changes over the past year and assess their consistency with adopted plans for the local government, adjoining local governments, and state agencies that provide funding assistance for the City's public facility improvements. The reporting requirements were expanded in 2009 by the MD General Assembly to include requirements for local governments to establish a specific percentage goal to increase the percentage of new development located within the local government's Priority Funding Area and to report on a series of "performance measures" to demonstrate the community's progress in concentrating growth and development. These new requirements are codified in the Land Use Article. The new Law exempts municipalities from these additional (2009) reporting requirements where all of the land in the municipality is located within a Priority Funding Area and where the municipality issues fewer than 50 building permits for "new residential units" in the reporting year. According to a 2010 determination by the Maryland Department of Planning, eligibility for this reporting exemption is based on the actual number of permits issued regardless of the number of dwelling units that were permitted by each permit.

In Cumberland, all of the City's area is located within a Priority Funding Area. Consequently, the City is not required to establish a specific percentage goal to increase the percentage of new development located within the City's Priority Funding Area, in accordance with The Land Use Article. In regard to the second reporting exemption criterion, the City issued a total of 10 building permits for new residential units in 2014. Therefore, the City is exempt from the additional reporting requirements added to the Land Use Article of the Maryland Annotated Code in 2009.

Once prepared by the Planning Commission, the report and its recommendations must be filed with and presented to the local Legislative Body, which may direct actions necessary "to insure the coordination of a viable planning and development process." Maryland Law also requires that the Annual Report be made available for public inspection, and that a copy must be mailed to the Secretary of the Department of Planning. This report shall fulfill the aforementioned Annual Report requirements for the City of Cumberland.

II. Development Activity

A. Construction & Occupancy Permits

To evaluate construction activity during 2014, staff reviewed all building, demolition, and occupancy permits issued over the calendar year. Permits issued for minor alterations, outbuildings (such as storage sheds or garages in support of an existing primary use structure), building additions (that did not result in new residential units or independent business spaces), and repairs were ignored in the analysis. Only building and occupancy permits that resulted in the construction or occupancy of new residential units or nonresidential units were included in the inventory. These permits represent development activity that added new capacity to the City, rather than building renovations and minor additions or changes in use from one commercial use to another.

When evaluating permit data, it is important to understand that a considerable time lag can occur between the issuance of a building permit to begin construction and an occupancy permit to occupy a completed building. This time lag can range from six months for a typical single family home when work begins at the start of the seasonal construction period to several years for a major project that is built in phases or is delayed by unanticipated site conditions, financing interruptions, or difficulties securing building supplies and/or unfavorable weather interruptions. Consequently, only a small number of the occupancy permits issued in any given fiscal year may be for buildings that received a building permit in the same fiscal year.

A tally of the 2014 permits that fall within these criteria shows that the City issued a total of 10 building permits for new residential construction, resulting in the addition of 10 units. This is a slight increase (numerically) relative to the gradual declines from the prior two years, where only 5 permits were issued in 2013 and 7 permits in 2012. If this increase persists, it may represent a slow pattern of recovery to the gradual increase that occurred from 2009 through 2011 (15 in 2009, 19 in 2010, and 26 in 2011). However, it should be noted that 8 of the 10 new residential building permits issued in 2014 were for homes built in the Cornerstone Hill project off James Day Drive, which is nearing build-out. Only 2 of the new residential building permits issued were for individual infill lots. Therefore, it is difficult to know at this time if the slight increase in permitted new housing units in 2014 represents a potentially sustainable housing construction recovery trend or merely a push to completion of a previously permitted residential development project. The total reported value of the residential building permits issued in 2014 was \$1,575,000, which represents a slight increase in the total value of new units built in 2013 (\$1,128,000) and 2012 (\$1,163,000).

No building permits for multiple family dwellings were issued during 2014, 2013, or 2012. The lack of multifamily dwelling projects in recent years reflects a general saturation of the rental market resulting from a number of tax credit-subsidized projects that were built during the height of the recent Recession (2007-2010). These subsidies were offered to stimulate apartment construction as a way to provide alternative affordable housing options for the growing number of homeowners displaced by foreclosure (due to sub-prime mortgage practices) during the Recession. However, the Recession-driven spike in foreclosures did not affect the Cumberland housing market to the same degree as other areas of

the state because mortgage costs did not increase as rapidly as in other areas (relative to actual home values) and fewer homeowners in the local housing stock hold mortgages on their properties. Consequently, the sudden increase in apartment construction in a housing market with lower overall population growth and fewer homeowner displacements contributed to greater saturation of the rental market.

A total of 8 occupancy permits for 8 new residential units were issued in 2014, which is consistent with the 8 occupancy permits for 10 new residential units that were issued in 2013. All 8 occupancy permits in 2014 were issued for the units built in the Cornerstone Hill project. This pattern represents a significant decline from the 28 residential occupancy permits issued in 2012. However a number of the residential units for which occupancy permits were issued in 2012 were for units that were issued building permits in prior years when more residential building permits were issued. The general pattern in residential occupancy permits further reflects a fluctuating trend over the prior years of 24 in 2009, 16 in 2010, and 36 in 2011.

These overall low permit figures continue to reflect the reduced level of development activity initially caused by the 2007 Economic Recession. Although the city appeared to experience a brief three-year recovery in residential building permit activity between 2009 and 2011, development activity has subsided over the past three years. This reversal can be attributed in large part to the sudden absence of multi-family development projects that helped buoy residential construction activity between 2009 and 2011. The relatively high number of occupancy permits issued for new residential units in 2012 reflected the completion and occupancy of units in three large multi-family projects (the Cumberland Meadows apartment complex on Old Willowbrook Road, Cumberland Townhomes II on Pennsylvania Avenue, and the Cornerstone Hill project on James Day Drive) that were issued building permits during those earlier years. As those earlier large projects are completed, the number of occupancy permits can be expected to decline until they more closely reflect the reduced building permit activity reflected in 2012 and 2013 permit data.

The City's permit records also show that a total of 12 residential demolition permits (removing a total of 14 residential dwelling units from the housing stock) were issued in 2014. These figures represent a gradual slow decline from the number of demolition permits issued in the past two years (15 residential demolition permits removing 15 residential units in 2013, and 19 residential demolition permits removing 22 former residential units in 2012). When the number of residential units demolished in 2104 (14) are subtracted from the number of new residential units permitted for construction during the year (10), the City realized a net loss of 4 residential units. As long as the number of demolitions continues to exceed the number of new residential dwelling units constructed during each year, the overall pattern of housing stock decline is likely to persist.

The City also issued a total of 4 residential occupancy permits for conversion projects that resulted in an additional net removal of 3 residential dwelling units from the City's housing stock. When the number of residential units gained or lost due to conversions of existing residential and commercial buildings is considered (-3 residential units), **the City's overall housing stock experienced a decrease of 7**

residential unit in 2014. This net decrease is greater than the net loss of 1 residential unit that occurred in 2013.

As noted earlier, 8 of the 10 new residential building permits issued in 2014 were concentrated in the Cornerstone Hill project just east of the City's downtown area, while the other two permits were issued for single family homes on the City's East and South sides. The map and tables provided at the end of this report show the property locations of the permits that were issued in 2014. All development activity occurred within the City's Priority Funding Area and in areas of the City that are currently served by adequate water and sewer.

Only two new building permits were issued in 2014 for new non-residential construction (the same number as was issued in 2013). One of these permits was issued for a new County Sheriff's Office on Kelly Road. The other was issued for a portable imaging system unit at the Western MD Health System on Willowbrook Road. The total value for new commercial construction in 2014 was \$430,000.

B. Site Plans

The only major site plan approved in 2014 was a condominium plat for the Cumberland Arms Building at 64 Baltimore Street. The plat, submitted in 2013, did not result in any new construction and did not create any new building lots on the property. The plat only divided the existing building into two condominium units. No new minor site plans for new buildings were approved in 2014. Only one minor and one major site plan was approved in 2013. There were no major site plan submissions/approvals in 2012.

C. Subdivision Plats

No new major subdivisions (creating five or more new lots) were filed or approved in 2014, 2013, or 2012. A revised Final Plat for the Averitt Commercial Subdivision on Messick Road was approved by the Planning Commission in 2014, however this plat revision did not increase or reduce the number of approved lots within the subdivision, it only transferred land from one existing lot of record in the subdivision to two others. Similarly, no new minor subdivisions were filed or approved in 2014, 2013, or 2012. The last minor subdivision plat was approved in 2011.

III. Regulatory Amendments & Annexations

The Planning Commission reports that two regulatory actions were completed during 2014. The city annexed two commercial properties along Ali Ghan Road on the city's northeastern corner. No other Zoning Map Amendments, Zoning Text Amendments, or Subdivision Regulation Amendments, were adopted during the year. A review of these changes is provided below.

A. Comprehensive Plan Amendments

No new comprehensive plan amendments were initiated or completed in 2014. The 2013 Comprehensive Plan update was completed on December 17, 2013 with the adoption of the City-Wide Element, which was the second and final volume of the plan. The City-Wide Element addressed the local issues and needs raised in the Neighborhood Element (which was adopted in 2012), contained the city's long-range planning and development policies, and also addressed the legal planning requirements of the Land Use Article of the Annotated Code of Maryland.

B. Zoning Text Amendments

No Zoning Text Amendments were adopted by the Mayor and Council in 2014. However, the 2013 Plan Comprehensive Rezoning was initiated by staff and the Planning Commission during the year. The comprehensive rezoning package includes a Comprehensive Zoning Text Amendment (ZTA 14-01), a Comprehensive Zoning Map Amendment (ZMA 14-01) and a Comprehensive Subdivision Regulations Text Amendment (SRA 14-01). The Planning Commission completed its public hearing on the proposed amendments that comprise the entire package on December 12, 2014. A final recommendation from the Planning Commission and subsequent action by the Mayor and Council are anticipated to be completed in 2015. No zoning text amendments were adopted in 2012, but two were adopted in 2011 and one was adopted in 2013.

C. Zoning Map Amendments

The City adopted no new Zoning Map Amendments in 2014, 2013 or 2012. As noted above, a comprehensive zoning map amendment (ZMA 14-01) is in progress as part of the 2013 Plan Comprehensive Rezoning. Final action on that amendment is anticipated in 2015. Two Zoning Map Amendments were filed and approved in 2011.

D. Subdivision Regulations Amendments

The City made no changes to the Subdivision Regulations in 2014 or 2013. As noted above, a comprehensive subdivision regulations amendment (SRA 14-01) is in progress as part of the 2013 Plan Comprehensive Rezoning. Final action on that amendment is anticipated in 2015.

E. Annexations

The City adopted two annexations in October 2014. The total area annexed was approximately 2.68 acres (the first parcel contained 2.13 acres and the second contained 0.55 acres). Both of these parcels are located along Ali Ghan Road and were incorporated into the Loves Travel Plaza landholding to become part of the commercial travel plaza that they are constructing. The annexed parcels have been zoned B-H (Highway Business) and were accepted by MDP as part of the city's Priority Funding Area. One additional annexation was approved in 2013 at the corner of Messick Road and Industrial Boulevard. No annexations were approved in 2012.

IV. Infrastructure Improvements/Extensions

A. Street Improvements

The City constructed no new public streets during 2014. All street improvements during the year involved surface restoration, reconstruction, and paving of existing streets. These paving projects are now governed by the City's Pavement Management System, which was completed in 2006. The Pavement Management System identified roughly \$67,000,000 in street improvement needs, and the Mayor and Council have obtained financing to begin implementation of the improvement schedule for the first three years.

The City continued work on a major street resurfacing/widening project (initiated in 2013) for significant portions of Baltimore Avenue (between the CSX railroad and Marion Street). The project also includes small sections of Front Street, Henderson Avenue, and Marion Street and is anticipated to be completed in 2015. Comprehensive patching work was undertaken with financial assistance from MDOT on a number of city streets, including significant portions of Greene, Centre, Lee, Beall, and Baltimore Streets, as well as portions of Louisiana, Virginia, Ashland, and White Avenues and Winifred Road. This patching work is intended to temporarily stabilize the travel surface until such time as funding can be committed to a more extensive street rehabilitation and resurfacing project. The city is in the process of preparing an ARC grant application for funding to rehabilitate Mechanic Street from I-68 to Bedford Street, including ADA crossing improvements. The city completed engineering work for a reconstruction of Chase Street, which was driven by a full water line replacement under the street to repair a leak. The reconstruction work is scheduled to be undertaken in 2015. The city also hired engineering/planning consultants for a CSX railroad bridge replacement (on Washington Street) and a proposed complete street redevelopment project for the Greene Street corridor between Baltimore Street and I-68. The Washington Street railroad bridge was reduced to single-lane traffic in 2014, due to deterioration of the structure. The latter project, which is being funded by the Cumberland Area MPO, will encompass a full rehabilitation of the street, sidewalk (including ADA crossings), and streetscape improvements. These studies are slated for completion in 2015.

Finally, the city is working with SHA officials to redesign the Virginia Avenue/Industrial Boulevard intersection to alleviate traffic congestion and a lengthy traffic signal cycle length. The city concurred with SHA's preliminary design for the project in 2014, and SHA has initiated final engineering and design work.

B. Water Extensions

No major water line extensions were undertaken by the City in 2014. The city is still awaiting construction of the Loves Travel Plaza so that the final extension of the new line constructed across Evitts Creek in 2013 can be completed. The city completed a major water line replacement project along Chase Street in 2014 to repair several leaks. The City also completed replacement of 36-inch inlet and outlet valves at Fort Hill Reservoir in 2014.

The City also completed several minor (routine maintenance) water line replacements in 2014 to upgrade aging lines. None of these replacement projects added any new capacity to the system, but are part of the City's ongoing efforts to target lines that may be in danger of failing.

C. Sewer Extensions/Improvements

No major sewer line extensions were undertaken by the City during 2014. A project to remove sludge and clean the anaerobic digester for the wastewater treatment plant is underway and anticipated to be completed in 2015. The City continued its work to expand stormwater storage capacity as part of the Combined Sewer Overflow project (which involves the planned addition of a storage and handling facility at the City's Wastewater Treatment Plant). The city's work on the ENR treatment system upgrade was completed in 2011 and the city began conducting routine sampling and flow monitoring in 2012.

D. Other Public Facility Improvements

The lion's share of the City's other public facility improvements undertaken during 2014 were related to public recreation. These projects included the design of bikeway improvements for Mechanic and Centre Streets and a bike lane along Frederick Street, both of which will be funded through the new MD Bikeways program. The initiation of construction on these projects is on hold pending authorization from the Mayor and Council. The proposed bike lane on Frederick Street generated considerable neighborhood controversy, and the Mayor and Council appears inclined to conduct a test of the traffic impacts of the proposed bike lane in the spring of 2015 before authorizing staff to begin work establishing the lane. Additional bicycle safety improvements for Canal Street were proposed in 2014, and the city has applied for ARC funding to finance that project.

IV. Consistency Assessment

A. Consistency between Infrastructure Improvements & Development Activity

All of the development activity that was permitted and undertaken during 2014 occurred within the City's Priority Funding Area and in areas where adequate infrastructure capacity was determined to exist. All development activity also occurred within areas designated as Septic System Tier 1 (served by municipal sewer) on the City's adopted SB 236 Septic System Tier Map. This map appears as an appendix in the City's 2013 Comprehensive Plan.

Overall residential development activity during the year resulted in a net decrease of 7 units, which exceeded the net loss of one unit in the previous year (2013). Most of the new residential units permitted for construction in 2013 were for a large residential development (Cornerstone Hill) that was permitted in previous years. The lack of any new major or minor subdivisions over the past few years suggests that the City can expect fewer residential building permits to be issued in outlying years. No new residential or commercial development permits were issued in the central business district during

2014. The City annexed two new properties in 2014 on the City's East Side, which will become part of the proposed Loves Travel Plaza, which is scheduled for construction in 2015.

B. Consistency with Adopted Plans

All development activity permitted in 2014 occurred in areas of the City where such activity was permitted by current zoning. These developments were approved as consistent with the 2013 Comprehensive Plan (conceptual future land use map), and were located within the City's Priority Funding Area. As part of the adopted 2013 Comprehensive Plan, the City established a desired population growth rate of up to 15% over a twenty-year planning horizon. The potential population impacts from development activity approved and permitted within the City during 2013 would not exceed that rate of growth.

The City's major infrastructure improvement projects undertaken in 2013 are all specifically recommended by or otherwise consistent with the City's Comprehensive Plan and supporting documents. These improvements resulted in little or no additional infrastructure capacity, which is commensurate with the level of development activity that occurred within the City in recent years.

C. Consistency with Adjoining Government Plans

In 2014, Allegany County completed the process of adopting a major update of its 2002 comprehensive plan. The development activity permitted in the City during 2014 was not incompatible with the County's new plan. Also, none of the development activity that did occur in the City in 2014 was adjacent to the County boundaries.

D. Consistency with State Financing Agency Plans

All of the major infrastructure improvement projects undertaken during 2014 involved State and/or Federal funding support, primarily the MD Department of the Environment (for the City's sewer improvement projects). These projects were determined to be in compliance in order to receive funding. All infrastructure improvements undertaken and development permits approved by the City in 2014 were located within the City's Priority Funding Area.

E. Consistency with Recommendations from Previous Annual Report

The last Annual Report prepared by the City's Planning Commission covered calendar year 2013. Many of the infrastructure projects undertaken in 2014 were continuations of projects discussed in the 2013 Annual Report. All projects undertaken during the year and all findings from this report are generally consistent with the previous report.

V. Conclusions & Recommendations

Based on this assessment, the City experienced a continued decrease in development activity from the 2013 report. Despite a slight increase in the number of building permits issued in the past year (10

permits issued in 2014 versus 5 permits in 2013, the City's overall housing stock realized a net decrease of 7 residential units, which results in a three-year pattern of reduced residential development from the peak years of the 2007-2009 Recession. Much of the reduced recent residential building permit activity can be attributed to the continued absence of multi-family construction, which had helped buoy residential permit activity during the years immediately following the Recession. Judging from the relative lack of new residential subdivision activity, the City anticipates that this trend will continue with a general tendency towards modest recovery in outlying years. Precisely when this recovery will take hold and how strong it may be depends on a number of critical economic influences, including continued recovery in the single family housing market, greater levels of job creation and stability, and expanded economic and population growth trends in the Washington and Baltimore areas.

All development activity approved in Cumberland in 2014 was generally consistent with the City's 2013 Comprehensive Plan and supporting documents, the City's Zoning Ordinance and the applicable provisions of the County's plans. The major infrastructure projects undertaken by the City during the year were consistent with the City's plans, consistent with the demands created by the development permits that were issued, and consistent with the applicable requirements and plans of the applicable State financing agencies.

Consequently, staff has determined that no changes in the City's current policies or plans are needed in response to the activities permitted and undertaken by the City during 2015.

BE IT ORDAINED BY THE MAYOR AND CITY COUNCIL OF CUMBERLAND:

Section 1. Authorization, Terms, Form of Bonds.

(a) Mayor and City Council of Cumberland (the “Issuer”) shall borrow upon its full faith and credit and shall issue and sell upon its full faith and credit an aggregate principal amount not to exceed Three Million Two Hundred Sixty Thousand Dollars (\$3,260,000.00) of its general obligation bonds, to be issued pursuant to the authority of Sections 4-101 through 4-255 of the Housing and Community Development Article of the Annotated Code of Maryland, as amended (the “Act”), to be known as the “Mayor and City Council of Cumberland Infrastructure Bonds, 2015 Series A” or by such other or additional designations as required by the Administration identified in subsection (b) below, including (without limitation) to identify separate series or subseries and/or to reflect a different year of issuance (collectively, the “Bonds”). The proceeds from the sale of the Bonds shall be used for the purpose of providing all or a portion of the funds necessary for (i) financing or refinancing costs of certain projects identified as follows: (A) Improvements to the Water System and the Sewer System, (B) Facility and Property Improvements, (C) Information Systems Improvements and Equipment, (D) Other Street Improvements, and (E) Acquisition of New and/or Replacement Vehicles and Equipment, together with, in each such case as is applicable with respect to the projects described in clauses (i)(A) through (E), the acquisition or payment for, as applicable, improved or unimproved land, necessary property rights and equipment, related site and utility improvements, and related planning, design, architectural, engineering, acquisition, demolition, construction, reconstruction, rehabilitation, renovation, repair, removal, construction management, permitting, installation, improvement, furnishing and equipping expenses and other related expenses, paving, repaving, sidewalk, curb, gutter and drain work, and functionally related activities necessary at the locations or facilities at which such undertakings occur (collectively, the “Project”), (ii) funding a portion of a capital reserve fund, and (iii) paying issuance and other costs related to the Bonds. Notwithstanding the foregoing description of the Project, the Mayor of the Issuer (the “Mayor”), in consultation with the City Administrator of the Issuer (the “City Administrator”), any other appropriate officials of the Issuer, and the Community Development Administration (the “Administration”), is hereby authorized and empowered, on behalf of the Issuer, to determine prior to the sale of the Bonds not to apply Bond proceeds to finance or refinance costs of any one or more components of the Project due to tax, budgetary or other concerns.

(b) The Bonds shall be issued as one or more fully registered bond certificate(s) in the aggregate principal amount not to exceed Three Million Two Hundred Sixty Thousand Dollars (\$3,260,000.00) payable to the Administration as the registered owner thereof. The Bonds shall be issued in such aggregate principal amount or such lesser aggregate principal amount as determined by the Mayor pursuant to subsection (g) below, which shall be equal to the aggregate principal amount of the loan or loans to the Issuer from the Administration (collectively, the “Loan”) under the Local Government Infrastructure Financing Program of the Administration (the “Program”).

(c) The Bonds shall be dated as of the date of issue, or as of such other date as is specified by the Administration; shall be numbered from R-1 upward or as otherwise required by

the Administration; shall be initially registered in the name of the Administration or its designee; shall bear interest from the date of issuance of the Local Government Infrastructure Bonds issued by the Administration (the "Administration's Bonds"), payable semiannually on May 1 and November 1, at such annual rate or rates and be payable in annual principal installments at the designated office of the Administration.

(d) The Bonds shall bear interest at an annual rate or rates of interest for a total interest cost (expressed as a yield) not to exceed 2.80 percent for a loan with a maturity of ten (10) years or less, and 3.85 percent for a loan with a maturity of more than ten (10) years but not more than twenty (20) years, the actual rate or rates of interest to be borne by the Bonds to be determined and established by the Mayor acting pursuant to Section 1(g) of this Ordinance.

(e) The Bonds shall be in substantially the form set forth on Exhibit A attached hereto and made a part hereof, which form, together with all of the covenants and conditions therein contained, is hereby adopted by the Issuer as and for the form of obligation or obligations to be incurred by the Issuer and such covenants and conditions are hereby made binding upon the Issuer, including the promise to pay therein contained.

(f) The Bonds are to be issued in connection with the Program to finance or refinance all or a portion of the costs of the Project and to pay costs of issuance, bond insurance premiums and other related costs. Under the Program, the Issuer will enter into a Repayment Agreement and a Pledge Agreement with the Administration (respectively, the "Repayment Agreement" and the "Pledge Agreement"). The Issuer also will execute and deliver in connection with the issuance of the Bonds and the Program any additional documents, agreements, instruments and certificates requested by the Administration (which, together with the Repayment Agreement and the Pledge Agreement, are herein referred to as the "Program Documents"). The Program Documents shall be in such forms and shall contain such terms and conditions as shall be approved by the Mayor and/or the City Administrator and acceptable to the Administration.

(g) Because this Ordinance is being passed before the details have been finalized for the financing pursuant to which the Administration will issue the Administration's Bonds (the "Administration Financing") that will fund the Loan to the Issuer under the Program, the Mayor is hereby authorized to make such changes to the amount and form of the Bonds, including insertions therein or additions or deletions thereto, as may be necessary or appropriate to conform the terms of the Bonds to the terms of the financing to be provided to the Issuer under the Program. Without limiting the foregoing, it is presently contemplated that the Loan will be in an amount not to exceed \$3,260,000.00 in aggregate principal amount hereby authorized, subject to final approval by the Administration; accordingly, the Mayor is specifically authorized: (i) to make changes to the aggregate principal amount of the Bonds in order to reflect the final aggregate principal amount of the Loan not to exceed \$3,260,000.00 as approved by the Administration and accepted by the Issuer, and (ii) to authorize and approve an interest rate or rates and payment schedule(s) reflecting the principal and interest payments with respect to the Bonds but not to exceed the maximum total interest cost to be borne by the Bonds as set forth in subsection (d) above.

Underlining = Indicates material added by amendment after introduction

~~Strike through~~ = Indicates material deleted by amendment after introduction

(h) This borrowing is in conformance with and does not exceed any and all applicable debt limitations under the Charter of the Issuer (the “Charter”).

Section 2. Execution. The Bonds shall be executed on behalf of the Issuer by the manual or facsimile signature of the Mayor, and the seal of the Issuer shall be affixed thereto or reproduced thereon and attested by the manual signature of the City Clerk of the Issuer (the “City Clerk”). The Program Documents shall be executed on behalf of the Issuer by the Mayor and/or the City Administrator. In the event any official whose signature appears on any of the Bonds or the Program Documents shall cease to be an official prior to the delivery of the Bonds or the Program Documents, or, in the event any official whose signature appears on any of the Bonds or the Program Documents becomes an official after the date of the issue, the Bonds or Program Documents shall nevertheless be valid and binding obligations of the Issuer in accordance with their terms. The Mayor is hereby authorized, empowered and directed to complete the applicable forms of the Bonds and to make modifications, deletions, corrections or other changes thereto in any manner which the Mayor, in the Mayor’s discretion, shall deem necessary or appropriate in order to complete the issuance and sale of the Bonds, as will not alter the substance thereof. The Mayor and/or the City Administrator are hereby authorized, empowered and directed to complete the applicable forms of the Program Documents and to make modifications, deletions, corrections or other changes thereto in any manner which such official, in the discretion of such official, shall deem necessary or appropriate in order to complete the execution and delivery of the Program Documents in accordance with the provisions of this Ordinance, as will not alter the substance thereof. The execution and delivery of the Bonds by the Mayor and the execution and delivery of the Program Documents by one or more of the duly authorized officials provided for in this Section 2 shall be conclusive evidence of such official’s or officials’ approval of the forms and substance thereof. To the extent appropriate, additional officials of the Issuer and the City Solicitor to the Issuer may be signatories to the Program Documents with respect to facts, representations, certifications, covenants and agreements within the scope of their respective responsibilities or authority.

Section 3. Registration of Bonds. The City Clerk shall act as registrar for the Bonds and shall maintain registration books for the registration and registration of transfer of the Bonds. No security or bond shall be required of the City Clerk in the performance of the duties of registrar for the Bonds.

The Issuer may deem and treat the person in whose name any Bond shall be registered upon the books of the Issuer as the absolute owner of such Bond, whether such Bond shall be overdue or not, for the purpose of receiving payment of, or on account of, the principal of, premium, if any, and interest on such Bond and for all other purposes.

Section 4. Prepayment. The Bonds are being issued in connection with the Program and will secure payment of the Administration’s Bonds, which are being issued by the Administration to provide funds to purchase the Bonds from the Issuer. The Repayment Agreement limits the right of the Issuer to prepay the Bonds in accordance with restrictions upon the right of the Administration to redeem the Administration’s Bonds. Accordingly, the Issuer may prepay the Bonds only in accordance with the provisions of the Repayment Agreement and the terms governing prepayments as set forth in the Bonds.

Any copy of this Ordinance duly certified by the City Clerk or the City Clerk's successor in office shall constitute evidence of the contents and provisions hereof.

(b) Any reference to an official of the Issuer in this Ordinance shall be deemed to include any such official serving in an "acting" capacity (e.g., the Acting City Administrator of the Issuer or the Acting City Clerk of the Issuer). Any reference to an official of the Issuer in this Ordinance shall be deemed to include references to such official if generally known by another title; titles of officials as used in this Ordinance correspond to the titles used in the Charter or the City Code of the Issuer (the "City Code").

Are You Planning To Buy, Rent, or Renovate a Home Built Before 1978?

Many houses and apartments built before 1978 have paint that contains lead (called lead-based paint). Lead from paint, chips, and dust can pose serious health hazards if not taken care of properly.

By 1996, federal law will require that individuals receive certain information before renting, buying, or renovating pre-1978 housing:

LANDLORDS will have to disclose known information on lead-based paint hazards before leases take effect. Leases will include a federal form about lead-based paint.

SELLERS will have to disclose known information on lead-based paint hazards before selling a house. Sales contracts will include a federal form about lead-based paint in the building. Buyers will have up to 10 days to check for lead hazards.

RENOVATORS will have to give you this pamphlet before starting work.

IF YOU WANT MORE INFORMATION on these requirements, call the National Lead Information Clearinghouse at 1-800-424-LEAD.

This document is in the public domain. It may be reproduced by an individual or organization without permission. Information provided in this booklet is based upon current scientific and technical understanding of the issues presented and is reflective of the jurisdictional boundaries established by the statutes governing the co-authoring agencies. Following the advice given will not necessarily provide complete protection in all situations or against all health hazards that can be caused by lead exposure.

IMPORTANT!

Lead From Paint, Dust, and Soil Can Be Dangerous If Not Managed Properly

- FACT:** Lead exposure can harm young children and babies even before they are born.
- FACT:** Even children that seem healthy can have high levels of lead in their bodies.
- FACT:** People can get lead in their bodies by breathing or swallowing lead dust, or by eating soil or paint chips with lead in them.
- FACT:** People have many options for reducing lead hazards. In most cases, lead-based paint that is in good condition is not a hazard.
- FACT:** Removing lead-based paint improperly can increase the danger to your family.

If you think your home might have lead hazards, read this pamphlet to learn some simple steps to protect your family.

Lead Gets in the Body in Many Ways

1 out of every 11 children in the United States has dangerous levels of lead in the blood-stream.

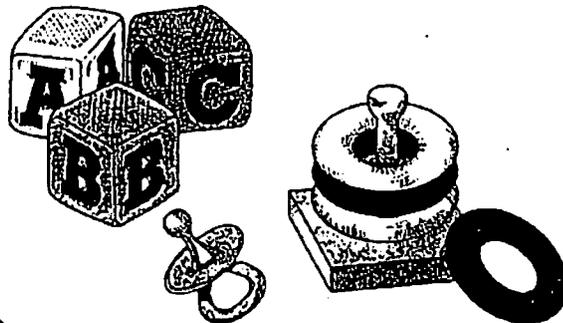

Even children who appear healthy can have dangerous levels of lead.

People can get lead in their body if they:

- ◆ Put their hands or other objects covered with lead dust in their mouths.
- ◆ Eat paint chips or soil that contain lead.
- ◆ Breathe in lead dust (especially during renovations that disturb painted surfaces).

Lead is even more dangerous to children than adults because:

- ◆ Babies and young children often put their hands and other objects in their mouths. These objects can have lead dust on them.
- ◆ Children's growing bodies absorb more lead.
- ◆ Children's brains and nervous systems are more sensitive to the damaging effects of lead.

2

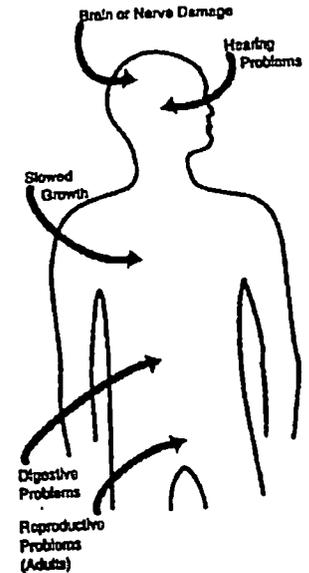

Lead's Effects

If not detected early, children with lead in their bodies can suffer from:

- ◆ Damage to the brain and nervous system
- ◆ Behavior and learning problems (such as hyperactivity)
- ◆ Slowed growth
- ◆ Hearing problems
- ◆ Headaches

Lead is also harmful to adults. Adults can suffer from:

- ◆ Difficulties during pregnancy
- ◆ Other reproductive problems (in both men and women)
- ◆ High blood pressure
- ◆ Digestive problems
- ◆ Nerve disorders
- ◆ Memory and concentration problems
- ◆ Muscle and joint pain

Lead affects the body in many ways.

3

Checking Your Family for Lead

Get your children tested if you think your home has high levels of lead.

A simple blood test can detect high levels of lead. Blood tests are important for:

- ◆ Children who are 6 months to 1 year old (6 months if you live in an older building or home that might have lead in the paint).
- ◆ Family members that you think might have high levels of lead.

If your child is older than 1 year, talk to your doctor about whether your child needs testing.

Your doctor or health center can do blood tests. They are inexpensive and sometimes free. Your doctor will explain what the test results mean. *Treatment can range from changes in your diet to medication or a hospital stay.*

Where Lead-Based Paint Is Found

In general, the older your home, the more likely it has lead-based paint.

Many homes built before 1978 have lead-based paint. In 1978, the federal government banned lead-based paint from housing.

Lead can be found:

- ◆ In homes in the city, country, or suburbs.
- ◆ In apartments, single-family homes, and both private and public housing.
- ◆ Inside and outside of the house.
- ◆ In soil around a home. (Soil can pick up lead from exterior paint, or other sources such as past use of leaded gas in cars).

Where Lead Is Likely To Be a Hazard

Lead-based paint that is in good condition is usually not a hazard.

Peeling, chipping, chalking, or cracking lead-based paint is a hazard and needs immediate attention.

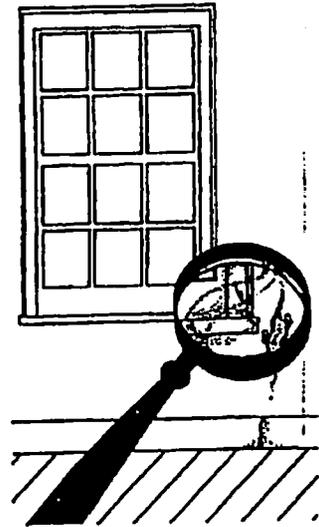

Lead-based paint may also be a hazard when found on surfaces that children can chew or that get a lot of wear-and-tear. These areas include:

- ◆ Windows and window sills.
- ◆ Doors and door frames.
- ◆ Stairs, railings, and banisters.
- ◆ Porches and fences.

Lead dust can form when lead-based paint is dry scraped, dry sanded, or heated. Dust also forms when painted surfaces bump or rub together. Lead chips and dust can get on surfaces and objects that people touch. Settled lead dust can reenter the air when people vacuum, sweep, or walk through it.

Lead in soil can be a hazard when children play in bare soil or when people bring soil into the house on their shoes. Call your state agency (see page 12) to find out about soil testing for lead.

Lead from paint chips, which you can see, and lead dust, which you can't always see, can both be serious hazards

Checking Your Home for Lead

Just knowing that a home has lead-based paint may not tell you if there is a hazard.

You can get your home checked for lead hazards in one of two ways, or both:

- ◆ A paint inspection tells you the lead content of every painted surface in your home. It won't tell you whether the paint is a hazard or how you should deal with it.
- ◆ A risk assessment tells you if there are any sources of serious lead exposure (such as peeling paint and lead dust). It also tells you what actions to take to address these hazards.

Have qualified professionals do the work. *The federal government is writing standards for inspectors and risk assessors. Some states might already have standards in place.* Call your state agency for help with locating qualified professionals in your area (see page 12).

Trained professionals use a range of methods when checking your home, including:

- ◆ Visual inspection of paint condition and location.
- ◆ Lab tests of paint samples.
- ◆ Surface dust tests.
- ◆ A portable x-ray fluorescence machine.

Home test kits for lead are available, but the federal government is still testing their reliability. These tests should not be the only method used before doing renovations or to assure safety.

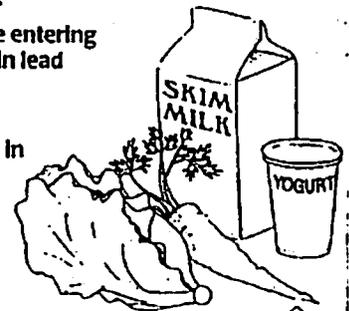

6

What You Can Do Now to Protect Your Family

If you suspect that your house has lead hazards, you can take some immediate steps to reduce your family's risk:

- ◆ If you rent, notify your landlord of peeling or chipping paint.
- ◆ Clean up paint chips immediately.
- ◆ Clean floors, window frames, window sills, and other surfaces weekly. Use a mop or sponge with warm water and a general all-purpose cleaner or a cleaner made specifically for lead. **REMEMBER: NEVER MIX AMMONIA AND BLEACH PRODUCTS TOGETHER SINCE THEY CAN FORM A DANGEROUS GAS.**
- ◆ Thoroughly rinse sponges and mop heads after cleaning dirty or dusty areas.
- ◆ Wash children's hands often, especially before they eat and before nap time and bed time.
- ◆ Keep play areas clean. Wash bottles, pacifiers, toys, and stuffed animals regularly.
- ◆ Keep children from chewing window sills or other painted surfaces.
- ◆ Clean or remove shoes before entering your home to avoid tracking in lead from soil.
- ◆ Make sure children eat nutritious, low-fat meals high in iron and calcium, such as spinach and low-fat dairy products. Children with good diets absorb less lead.

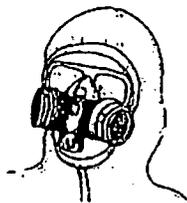

7

How To Significantly Reduce Lead Hazards

Removing lead improperly can increase the hazard to your family by spreading even more lead dust around the house.

Always use a professional who is trained to remove lead hazards safely.

8

In addition to day-to-day cleaning and good nutrition:

- ◆ You can temporarily reduce lead hazards by taking actions like repairing damaged painted surfaces and planting grass to cover soil with high lead levels. These actions (called "interim controls") are not permanent solutions and will not eliminate all risks of exposure.
- ◆ To permanently remove lead hazards, you must hire a lead "abatement" contractor. Abatement (or permanent hazard elimination) methods include removing, sealing, or enclosing lead-based paint with special materials. Just painting over the hazard with regular paint is not enough.

Always hire a person with special training for correcting lead problems—someone who knows how to do this work safely and has the proper equipment to clean up thoroughly. If possible, hire a certified lead abatement contractor. Certified contractors will employ qualified workers and follow strict safety rules as set by their state or by the federal government.

Call your state agency (see page 12) for help with locating qualified contractors in your area and to see if financial assistance is available.

Remodeling or Renovating a Home With Lead-Based Paint

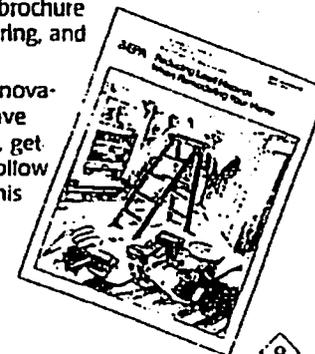

Take precautions before you begin remodeling or renovations that disturb painted surfaces (such as scraping off paint or tearing out walls):

- ◆ Have the area tested for lead-based paint.
- ◆ Do not use a dry scraper, belt-sander, propane torch, or heat gun to remove lead-based paint. These actions create large amounts of lead dust and fumes. Lead dust can remain in your home long after the work is done.
- ◆ Temporarily move your family (especially children and pregnant women) out of the apartment or house until the work is done and the area is properly cleaned. If you can't move your family, at least completely seal off the work area.
- ◆ Follow other safety measures to reduce lead hazards. You can find out about other safety measures by calling 1-800-424-LEAD. Ask for the brochure "Reducing Lead Hazards When Remodeling Your Home." This brochure explains what to do before, during, and after renovations.

If you have already completed renovations or remodeling that could have released lead-based paint or dust, get your young children tested and follow the steps outlined on page 7 of this brochure.

If not conducted properly, certain types of renovations can release paint and dust into the air.

9

State Health and Environmental Agencies

Some cities and states have their own rules for lead-based paint activities. Check with your state agency (listed below) to see if state or local laws apply to you. Most state agencies can also provide information on finding a lead abatement firm in your area, and on possible sources of financial aid for reducing lead hazards.

Simple Steps To Protect Your Family From Lead Hazards

If you think your home has high levels of lead:

- ◆ Get your young children tested for lead, even if they seem healthy.
- ◆ Wash children's hands, bottles, pacifiers, and toys often.
- ◆ Make sure children eat healthy, low-fat foods.
- ◆ Get your home checked for lead hazards.
- ◆ Regularly clean floors, window sills, and other surfaces.
- ◆ Wipe soil off shoes before entering house.
- ◆ Talk to your landlord about fixing surfaces with peeling or chipping paint.
- ◆ Take precautions to avoid exposure to lead dust when remodeling or renovating (call 1-800-424-LEAD for guidelines).
- ◆ Don't use a belt-sander, propane torch, dry scraper, or dry sandpaper on painted surfaces that may contain lead.
- ◆ Don't try to remove lead-based paint yourself.
